OUR MISSION STATEMENT

1 OUR MISSION

“Creating and fostering higher knowledge and wisdom”

How can we, the human race, develop and grow in a steady and sustainable manner for the sake of future generations? At Okayama University, we have the answer. It is imperative that we build up our knowledge in order to advance education and research. As a public institution of higher learning, we are committed to contributing to this advancement by providing a positive environment for the creation of higher knowledge through research and the passing on of wisdom to younger generations through education and community service.

2 OUR PURPOSE

“Building up a new paradigm for a sustainable world”

As one of the leading universities in Japan, we aim to create and establish a new paradigm for the sustainable development of the world. We are being confronted with problems of global proportions in terms of the environment, energy issues, food supplies, economics, health, security and education. Thus, we are constantly seeking ways for humans to co-exist in harmony with nature. With this in mind, our university offers a wide range of academic fields, which are the basis of our integrated graduate schools. This not only allows us to conduct the most advanced and up-to-date research, but also provides an enriching educational experience.

3 OUR GOALS

(1) For education

Okayama University's most important mission is to provide an enriching educational environment for our students. Our commitment to each and every student is to offer them meaningful interaction with the university faculty and staff, whether it be in classroom settings or one-on-one tutorials. In this way, we hope to develop graduates who can think critically and logically and who can contribute to society.

(2) For research

We believe that the research we engage in is a fundamental basis for the innovation and creativity in this university. We are striving to become one of the leading research institutions of Japan and the world.

(3) For society

As an institution of higher learning, Okayama University creates a wide range of knowledge and technologies which can be used to help solve the problems of society and we interact with the outside community.

(4) For administration

To achieve our goals in research and education by the highly efficient management system, we can make even better use of the resources from our own faculties, staff, and facilities.

(5) For self-evaluation

To provide accountability as a public institution, we constantly evaluate our work in research, education, our contribution to society, and university management. The results of these evaluations are taken into account for future university reform.

ACADEMIC CALENDAR

April 1	Academic Year begins. First Term begins. First Semester begins.
April 2	Entrance Ceremony
June 9	First Term ends.
June 10	Second Term begins.
August 10	Second Term ends.
August 11	Summer Vacation (until September 30)
September 25	Graduation Ceremony
September 30	First Semester ends.
October 1	Third Term begins. Second Semester begins. Autumn Entrance Ceremony.
October 22	University Anniversary
December 2	Third Term ends.
December 3	Fourth Term begins.
December 25	Winter Vacation (until January 4)
February 14	Fourth Term ends.
February 15	Spring Vacation (until March 31)
March 25	Graduation Ceremony
March 31	Second Semester ends. Academic Year ends.

HISTORICAL TIMELINE

Okayama Medical College

The Sixth Higher School

Okayama Prefectural Normal School

Opening Ceremony of Okayama University (Oct. 22, 1949)

Okayama University Tsushima Campus (1963)

1922

Okayama Prefectural School for Training Teachers of Vocational Supplementary School

1924

Okayama Prefectural School for Training Teachers of Girls' Vocational Supplementary School

1935

Okayama School for Training Teachers of Youth's School

1936

Okayama Prefectural School for Training Teachers of Girls' School

1939

Misasa Hot Spring Rehabilitation Center

1943

Research Center for Radio-Balneology

1944(superseded in 1951)

Okayama Youth's Normal School

1946

Okayama Agricultural College

1949(superseded in 1951)

Okayama Agricultural College

- Department of Pharmacy
- Department of Pharmaceutical Technology

School of Engineering (1 Department 11 Subjects)

- Department of Engineering for Sustainable Development

School of Agriculture (1 Department 4 Subjects)

- Department of Agricultural Sciences

Discovery Program for Global Learners

The Discovery Program for Global Learners offers an interdisciplinary education that crosses traditional departmental divisions. Students develop a personalized curriculum that matches their academic and career goals under the close guidance of an academic advisor. The Discovery Program aims to nurture inspiring young leaders who will take active roles on the global stage. Graduates of the Discovery Program earn a Bachelor of Arts and Sciences Degree.

RESEARCH INSTITUTE

Institute of Plant Science and Resources (IPSR)

Institute of Plant Science and Resources was originally established in 1914 as the “Ohara Institute for Agricultural Research” with the aim of advancing the agricultural sciences. The founder was Magosaburo Ohara, a major figure in the modernization of Okayama. In 1952, the institute became affiliated with Okayama University and was renamed the “Institute for Agricultural Biology”. In 1988, the Institute was renamed the “Research Institute for Bioresources”. On April 1, 2010, the institute was renamed the “Institute of Plant Science and Resources” (IPSR) as a joint usage/research center for scientists in Japan. IPSR comprises Atmospheric Stress unit, Soil Stress unit, Biotic Stress unit, Genetic Resources unit, and Applied Genomics unit under two research areas (Research Core for Plant Stress Science and Research Core for Future Crops) and one research center (Barley and Wild Plant Resource Center). The institute's current scientific mission is to develop new crops that will be suited for multiple stress environments and to promote agricultural production in stress affected areas worldwide.

Institute for Planetary Materials (IPM)

The Institute for Planetary Materials (IPM) was established in 2016 through the reorganization of the Institute for Study of Earth's Interior. IPM is located at Misasa, Tottori. IPM is a top-class research institution in the field of Earth and planetary materials science with a range of experimental facilities and analytical expertise. The Institute's research divisions are “Planetary Materials Experimental Physics”, “Planetary Materials Applied Chemistry”, and “Planetary Surface Environment”. These research divisions explore the origin, evolution, and dynamics of planetary materials, including the Earth, as well as conduct advanced research not bound by existing academic disciplines using a comprehensive and universal approach to materials science. In addition, IPM is pioneering socially applicable research on global environmental issues and human planetary migration with research institutes worldwide. Finally, from FY 2025, the institute has been promoting the education of next-generation researchers who can be active in the world through the Misasa International Student Internship Program for students who participate in research projects proposed by the faculty.

Research Institute for Interdisciplinary Science (RIIS)

Research Institute for Interdisciplinary Science (RIIS) was established in April 2016, to study physics and fundamental biological science with an extensively interdisciplinary approach. In particular, RIIS investigates neutrino physics using laser spectroscopy, the structure and mechanism of natural photosynthesis and the fabrication of artificial photosynthesis systems, new functional materials for future electronic devices, the design of superconducting materials with a high superconducting critical temperature, and the theoretical elucidation of the properties of energy storage materials. Furthermore, RIIS aims at producing new functional materials and devices through interdisciplinary collaboration by physicists, mathematicians, chemists, and biologists. In April 1, 2023, RIIS established an International Structural Biology Center as an attachment center, to which not only the researchers related to the structural biology within RIIS but also over the university joined. RIIS has introduced a cryo-electron microscope in 2023, and the new structural biology center is using the new cryo-electron microscope jointly with other techniques and researchers from both within the university and outside of the university, to advance structural biology and related researches.

Research Institute for the Dynamics of Civilizations (RIDC)

The Research Institute for the Dynamics of Civilizations (RIDC) was established in April 2021 by reorganizing the Center for Research on the Dynamics of Civilizations, formerly attached to the Graduate School of Humanities and Social Sciences. RIDC is an interdisciplinary research hub centered primarily on the humanities and social sciences, including archaeology, history, anthropology, economics, sociology, and philosophy, that aims to facilitate close collaboration with researchers in various scientific fields at Okayama University and other institutions in Japan and abroad. Since 2022, the institute has been organized into the Research Division and the Cultural Heritage Management Division, and is also responsible for conducting excavation of and research on the archaeological sites on campus. The Research Division has three research cores: the Fundamental Science of Civilizations Research Core, the Social Dynamics Research Core, and the Regional Dynamics Research Core. RIDC aims to contribute to the construction of a sustainable society by clarifying the complex dynamics of how social organizations, technologies, beliefs, economics, and the arts are interrelated and how they change the way people live.

The Ikeda Family Collection (Ikedake Bunko)

The Central Library houses the Ikeda Family Collection (Ikedake Bunko) which contains records and documents of the Ikeda clan, the feudal lords of Okayama from 1632 to 1871. The collection consists of an archive of about 100,000 legislative documents, Japanese classics, and Chinese classics. The collection is well known as a source of primary materials for research on the Shogunate government and clan governments during the Edo period.

Map of Bizen Province(1596-1615.
Okayama Castle can be seen in the lower left)

JOINT USAGE / RESEARCH CENTER

Institute of Plant Science and Resources (IPSR)

Institute of Plant Science and Resources (IPSR) is serving as a nationwide “Joint Usage/Research Center” for plant genetic resources and stress science. It is focused on research of plant responses and adaptation to variable stress conditions using plant genetic resources developed at the institute. IPSR annually manages research projects from outside the institute and makes its advanced research equipment and instruments available for such “Joint Usage/Research Center” projects. IPSR also has a new guesthouse as accommodation for visiting researchers.

Institute for Planetary Materials (IPM)

The Institute for Planetary Materials (IPM) was designated as a Joint Usage/Research Center in “Planetary Material Science” by the Ministry of Education, Culture, Sports, Science and Technology (MEXT) in 2022 based on its achievements as a “Nationwide Joint Usage Center” and “Joint Usage/Research Center”. The Institute is an internationally unique comprehensive analytical and experimental facility. IPM provides opportunities for research to a large number of domestic and international researchers and students, offering its technology and knowledge. IPM seeks to develop new research fields in Earth and planetary material science through approaches such as chemical analysis, dating structural analysis, and high temperature and high-pressure experiments.

JOINT USAGE / EDUCATION CENTER

Ushimado Marine Institute (UMI)

Ushimado Marine Institute (UMI) has been selected as a “joint-use/collaboration center” in the field of experimental, integrative biology and as a leading center-of-excellence among the marine stations in Japan by the Ministry of Education, Sports, Culture, Science and Technology, since April 2011.

		Single Researchers (long-term)	3		
		Single Researchers (short-term)	30		
International Student Shared House		For Single Students (mixed functions) *1 room for Japanese student and 3 rooms for international students	120	2,310	6-2 Tsushima-Kuwanokicho, Kita-ku, Okayama

Accommodation for International Students and Researchers

Okayama University has four accommodations for international students and researchers: Kuwanoki Dormitory for International Students, Fukui Dormitory for International Students, International House for International Students and Researchers, and International Student Shared House which is for international and Japanese students.

These accommodations are established for the purpose of providing a place of residence for international students and researchers engaged in study and research at the university, and also contributing to the promotion of international exchange.

International Student Shared House

International Student Shared House was established with the aim of providing international and Japanese students with a place to live and fostering global human resources who acquire an international sense by being exposed to foreign languages, cultures and lifestyles through their daily life. It has a form in which four students live together as a unit while keeping private rooms for each person, and is designed so that residents can interact with each other naturally.

All of the accommodations are located in convenient locations close to the Tsushima area, which is the center of the university, and students and researchers living there spend a fulfilling study and research life in a comfortable living environment.

Okayama Visionary Commons (OUC)

To commemorate the launching of the Architecture, Civil Engineering and Environmental Management Program in April 2021, Okayama University has constructed the "Okayama Visionary Commons (OUC)". The OUC is a two-story wooden building envisioned as "everyone's innovation space" not only for the university but also for the community and businesses where citizens, students, and faculty can gather for mutual learning and exchange.

Designed by the world renowned architect and Distinguished Invited Professor, KUMA Kengo, the OUC has a capacity of 312 people with a large lecture hall and research spaces. The OUC also serves as a full-scale architectural example showcasing state-of-the-art construction methods utilizing wooden CLT (Cross-Laminated Timber) panels thereby playing an additional role as an educational and research hub for wooden construction and forest conservation, taking advantage of Okayama Prefecture's leading production of CLT panels. The OUC is expected to become a symbol of Okayama's commitment towards a sustainable society by promoting Sustainable Development Goals (SDGs).

Junko Fukutake Hall and Junko Fukutake Terrace

Okayama University wishes to enhance the civic life of Okayama city by deepening the links between the citizens and the university community. One part of this integration has been the establishment of informal meeting places for citizens and the university community designed by the world famous Japanese architects SANAA. There is one at the Shikata campus, the Junko Fukutake Hall, and the other, the Junko Fukutake Terrace, is located at Tsushima campus. The Junko Fukutake Hall is a series of wooden triangular roofs that allow natural light making a bright, flexible space where concerts, lectures, and public events are often held. The Junko Fukutake Terrace is also a construction based on steel frames but with curving glass walls and an undulating roof. It serves as a cafe and sometimes a display space.

Knowledge and Innovation Building with Integrated Networks in Okayama through Vibrant Exchange KIBINOVE

KIBINOVE, which opened on the Tsushima Campus in May 2025, is a new facility designed to link academic research and the real world. KIBINOVE will build on the research conducted at Okayama University to solve social issues in collaboration with local governments and industry. KIBINOVE aims to foster innovative solutions to social issues and positive social change through links between Okayama University and local government and industry.

KIBINOVE is where diverse stakeholders from industry, academia, and government can connect, where experimentation and analysis take place, and where new ideas emerge through collaboration.

KIBINOVE welcomes not only the university community, but also companies to use its state-of-the-art experimental facilities and rental offices. KIBINOVE aims to become a dynamic hub where knowledge is shared and innovation flourishes.

50th Anniversary Hall

The 50th Anniversary Hall celebrates Okayama University's half century since founding. The hall represents Okayama University's continued dedication to advance education and research, as well as to improve academic and cultural standards by providing a venue for educational and academic exchanges. The 50th Anniversary Hall is a versatile facility for international conferences, receptions, lectures, seminars, and meetings with the local community.

RELATED ORGANIZATION

The Consortium of Six National Universities in Japan

To enhance education and academic research and to develop joint educational programs, a group of national universities (Chiba University, Niigata University, Kanazawa University, Okayama University, Nagasaki University and Kumamoto University) organized The Consortium of Six National Universities in Japan.

Okayama University Alumni

Okayama University Alumni, unlike the former alumni association centering on alumni only, was founded in October 2013, as network organization that supports the development of Okayama University as an "All Okadai" organization. Okayama University Alumni aims for the advancement of its members including everyone who has participated in the intellectual activities of Okayama University - not only alumni, but also currently enrolled students, current faculty staff, former faculty staff, international students, research students, and all other people who have been or are at present associated with Okayama University.
