Okayama University Hospital
Orthodontic Clinic

English Care
(International Medical Support)

Last updated: October 19, 2026

Key Features of Our Clinical Service

Evidence-Based Care Unique to University Hospitals
Based on research findings and extensive clinical experience, we provide safe and reliable orthodontic treatment.

Multidisciplinary Team Approach
We deliver comprehensive treatment in collaboration with Oral Surgery, Pediatric Dentistry, Prosthodontics, and other departments.

Patient-Centered, Low-Friction Treatment
We use appliances and materials that apply minimal force to minimize pain and physical burden on patients.

Board Certifications & International Credentials

Our clinical staff includes board-certified orthodontists and senior instructors from the Japanese Orthodontic Society (JOS), alongside specialists with international credentials like Membership in Orthodontics (MOrtho RCSEd). Care is delivered in collaboration with resident orthodontists.

Main Indications & Conditions Treated

- Dental Crowding
- Maxillary Protrution /Madibular Prognathism
- Jaw Deformities / Malocclusion resulting from diseases specified by the Ministry of Health, Labour and Welfare

Orthodontic Appliances & Modalities

Temporary Anchorage Devices(TADs)
Surgically placed orthodontic anchor screws that provide absolute anchorage for complex and efficient tooth movement.

Labial Brackets
Conventional brackets fitted on the facial surfaces. Aesthetic clear/ceramic options are utilized for anterior teeth.

Clear Aligner Therapy
Removable, transparent appliances that offer exceptional aesthetics and facilitate optimal oral hygiene.

Lingual Brackets
Brackets attached to the lingual surfaces of the teeth, enabling fully customized treatment.
